### NEW FEATURES

#### Certified Fire Rating to CPAI-84

This is a US standard indicating that the material is rated to withstand a certain amount of heat and exposure to sparks/fire before it catches fire. Please note that this doesn't mean it is completely fire-proof.

#### New Stitching Process

We have moved away from the traditional binding on side seams to a flat stitch. This allows all seams to be tape sealed and even more waterproof.

#### New Awning Structure

We have moved the awning back to the front seam. This allows for a more waterproof seal by protecting the front binding and also changes the zipper configuration to one zipper for easier installation of side panels.

#### Includes Fly

We have now included the fly with the tent. The use of a fly in a single skin tent can greatly reduce the amount of condensation in colder weather and keep the tent cooler in warmer weather.

#### New Material

We have changed the material we use of this tent to reduce the weight of the tent and to conform to the fire rating standards set in the US.
